

Activity Guide - Personal Website Planning Guide

Brainstorm Content

You will be creating your own personal website. An important part of building a website is knowing the content that you'd like to include. Since this is your website you'll be able to decide what hobbies, interests, or messages you'd like to share. Use the prompts and space below to brainstorm content you'd want to include in your personal website.

- What are things you like to do for fun?
- What are things you know more about than other people?
- What are things you care about in your school, your community, or even the world at large?
- What messages do you want to share with a wide audience?

Use the space below to write your ideas

I want my website to be a cat adoption page. It will have lots of cats and how you can adopt them. I want people to know how to take good care of their cats and to adopt cats from the pet shelter.

Website Sketch

Choose **one topic from your list above** and draw a quick sketch of a web page that presents that content in an interesting way. Try to think of ways to structure and style your content to better communicate and emphasize your message.

Cat Adoption

Do you want a fun pet that is easy to take care of?
